

EDUCATION

San Francisco State University (San Francisco, CA)

Bachelor of Science in Computer Science

Jan '22 – May '24

Skyline College (San Bruno, CA)

Associate in Science

Jan '17 – May '21

EXPERIENCE

Full Stack Software Engineer Intern

May – Aug 2023

7Qubes (Remote)

- Developed and maintained 7qubes website in Python, Django, MySQL, REST Framework and Javascript
- Collaborated with team members to troubleshoot and resolve critical issues

Junior Software Engineer

Aug – Nov 2024

Revature (Remote)

- Assisted senior engineers with debugging and improving code quality
- Engaged in team discussion to identify and resolve technical challenges

Site Reliability Engineer Support Analyst

Jan - Oct 2025

American Express (Hybrid)

- Collaborated with senior engineers to diagnose system issues, improve operational workflows and ensure high availability of services using Grafana for monitoring, Splunk for log analysis and Jira for incident tracking
- Contribute to incident analysis and technical discussions, documenting findings and runbooks in Confluence to enhance system resilience and reduce future risk

PROJECTS

Auction Platform | C#, ASP.NET core, Microservices, REST APIs, React, Typescript, PostgreSQL, MongoDB, RabbitMQ, Docker, YARP, Kubernetes, CI/CD, Git, SignalR, Redis, Unit test, Postman

- Built a full-stack microservices application using ASP.NET CORE and React with PostgreSQL and MongoDB
- Designed even-driven communication between services using RabbitMQ and MassTransit
- Implemented an API Gateway with YARP to route frontend traffic and secure endpoints with JWT authentication
- Containerized services with Docker and deployed on Kubernetes, integrating Redis caching, CI/CD pipelines and unit tests to improve scalability, performance and deployment reliability

MiniTicket | Java, Spring Boot, Spring MVC, Spring Cloud, Spring Data JPA/Hibernate, REST APIs, PostgreSQL, React, Typescript, Docker, Kubernetes, CI/CD, Microsoft Azure, Kafka, Keycloak, Redis, Postman, Jenkins, Redux, Ansible, Terraform, JUnit, jQuery, Redux, Git

- Created a microservices-based ticket management system using Java, Spring Boot, Spring Cloud and REST APIs
- Secured authentication and authorization with Keycloak, integrated via Spring Security and Spring Cloud Gateway for centralized routing and access control
- Developed Ticket and Comment services using JPA/Hibernate and PostgreSQL with Redis caching and Kafka-based event-driven communication.
- Containerized and documented services using Docker, Postman and prepared CI/CD and cloud deployment with Jenkins, Kubernetes, Azure, Terraform and Ansible

Meal Kit | Java, Spring boot Javascript, MySQL, Spring MVC, TheMealDB API, bootstrap, AWS,

- Developed a full-stack web application with Java serving a REST APIs, supported by a MySQL database
- Integrated TheMealDB API to dynamically generate recipes based on user selected countries and ingredients
- Implemented secure user authentication to enhance user experience
- Deployed the application on AWS EC2 Ubuntu server

Pokemon Party | MongoDB, Express, React, Node, Javascript, REST APIs, bootstrap, Git, AWS, Visual Studio

- Built a dynamic website for Pokemon collectors using the MERN stack
- Integrated the Pokemon API to fetch and display detailed Pokemon data
- Utilized AWS for deployment, ensuring high availability and optimal performance

TECHNICAL SKILLS AND INTERESTS

Languages: Java | C# | Python | Javascript | React | Typescript | MySQL | SQL Server | HTML and CSS
Software & Tools : Spring Boot | Spring MVC | ASP.NET Core | Flask | Django | Node.js | Express.js | MongoDB | PostgreSQL | Git | Bootstrap | jQuery | Figma | Postman | Docker | EC2 | AWS | Kubernetes | CI/CD | Agile
