

EDUCATION

San Francisco State University (San Francisco, CA)

Bachelor of Science in Computer Science

Jan '22 – May '24

EXPERIENCE

Software Engineer

Jan - Oct 2025

American Express (Hybrid) Contracted with Infosys

- Developed and maintained Java microservices using Spring Boot with Kafka event-driven communication, JWT authentication, and Docker/Kubernetes deployments across CI/CD pipelines
- Built responsive frontend interfaces using React and Typescript, integrating with backend REST APIs to deliver features in Agile sprint cycles
- Monitored service health and reliability using Grafana dashboards and Splunk log analysis to accelerate root cause analysis and maintain system availability
- Wrote unit and integration tests using JUnit and Mockito, collaborating with DevOps teams to deploy applications on AWS

Junior Software Engineer

Aug – Nov 2024

Revature (Remote)

- Built and debugged Java/Spring Boot features, improving code quality through peer reviews and refactoring
- Wrote JUnit tests for REST endpoints and service layers, collaborating with senior engineers to resolve technical issues in sprint cycles

Full Stack Software Engineer Intern

May – Aug 2023

7Qubes (Remote)

- Developed and maintained 7qubes website using Python, Django, MySQL, REST Framework and JavaScript
- Built and integrated REST APIs to deliver new user-facing features, troubleshooting critical issues alongside the engineering team

PROJECTS

Auction Platform | C#, ASP.NET core, Microservices, REST APIs, React, Typescript, PostgreSQL, MongoDB, RabbitMQ, Docker, YARP, Kubernetes, CI/CD, Git, SignalR, Redis, Unit test, Postman

- Built a full stack microservices application using ASP.NET CORE and React with PostgreSQL and MongoDB to support real time auction listing and buyer interactions
- Designed event-driven communication between services using RabbitMQ and MassTransit
- Implemented an API Gateway with YARP to route frontend traffic and secure endpoints with JWT authentication
- Containerized services with Docker and deployed on Kubernetes, integrating Redis caching, CI/CD pipelines and unit tests to improve scalability, performance, and deployment reliability

MiniTicket | Java, Spring Boot, Spring MVC, Spring Cloud, Spring Data JPA/Hibernate, REST APIs, PostgreSQL, React, Typescript, Docker, Kubernetes, CI/CD, Microsoft Azure, Kafka, Keycloak, Redis, Postman, Jenkins, Redux, Ansible, Terraform, JUnit, jQuery, Redux, Git

- Created a microservices-based ticket management system using Java, Spring Boot, Spring Cloud and REST APIs
- Secured authentication and authorization with Keycloak, integrated via Spring Security and Spring Cloud Gateway for centralized routing and access control
- Developed Ticket and Comment services using JPA/Hibernate and PostgreSQL with Redis caching and Kafka-based event-driven communication
- Containerized and documented services using Docker, Postman and prepared CI/CD and cloud deployment with Jenkins, Kubernetes, Azure, Terraform and Ansible

BookClub | Python, Django, MySQL, Javascript, bootstrap, AWS, Visual Studio

- Developed a social media platform for book enthusiasts using Django as the backend framework
- Implemented user authentication and interactive features including likes, comments, following and book posting to foster community interaction

Pokemon Party | MongoDB, Express, React, Node, Javascript, REST APIs, bootstrap, Git, AWS, Visual Studio

- Built a dynamic website for Pokemon collectors using the MERN stack
- Integrated the Pokemon API to fetch and display detailed Pokemon data
- Utilized AWS for deployment, ensuring high availability and optimal performance

TECHNICAL SKILLS AND INTERESTS

Languages: Java | C# | Python | Javascript | React | Typescript | MySQL | SQL Server | HTML and CSS
Software & Tools : Spring Boot | Spring MVC | ASP.NET Core | Flask | Django | Node.js | Express.js | MongoDB | PostgreSQL | Git | Bootstrap | jQuery | Figma | Postman | Docker | EC2 | AWS | Kubernetes | CI/CD | Agile | Microservices | Grafana | Splunk | Jira | Claude Code | Codex | Copilot
